

AU CPROLUX

DESCRIPTION	Transparent protection for metal plates	
TECHNICAL DATA	AU CPROLUX is made of a 70 gr/m ² , 95 µm silicone coated paper liner and a 70 gr/m ² , 60 µm PVC film .	
EQUIPMENT	Heat press and spatula	
SUITABLE FOR	Ideal for plates and other flat objects in aluminum.	AU CPROLUX is a glossy transparent protective film for toner printed aluminium . It's a micro perforated film . Ideal for protecting your prints . Makes toner more resistant outdoors . Available in rolls .

FEATURES

INSTRUCTIONS	1 Cut AU CPROLUX a bit bigger than the object that needs protection. Remove the adhesive part from the paper liner and place it on the plate. Use a spatula (AUSFELTR25) with the felt side first and then with the plastic side to remove possible air bubbles making the protection stick perfectly. 2 N.B.: If air bubbles remain pull away protection and repeat last step. Cover the entire protection with a silicone paper sheet (AU CFC SILUX) which must be bigger than the plate and a double layer of polyester cloth (MA STUOI 04). Procede with a heat press as follows: Air heat press: 150°C for 120" - pressure 5atm 3 Manual press: 150°C for 120" - high pressure 4 Quickly remove silicone paper (AU CFC SILUX). When cool trim with a cutter.
--------------	---

WARNINGS	The toners have a 3 year resistance outdoors. Scratch resistance is guaranteed by the transfer paper itself. For further information contact your dealer	Store in a cool dry place. Do not expose to direct sunlight. If properly stored the product will maintain its features for at least 2 years.	STORAGE
