

# AUSPRIELMW

DESCRIPTION

**Clear liquid polyurethane primer for natural and artificial leather**

TECHNICAL DATA

AUSPRIELMW is a **mixture of polymers** in water dispersion.

EQUIPMENT

Airgun or brush

SUITABLE FOR

Natural or synthetic leather, coated PVC or PU

FEATURES

**AUSPRIELMW** is a **clear liquid polyurethane primer** that promotes **perfect adhesiveness** with **PSSOFT, PSSOFTKR and PSSOFTKR2** transfer papers for solvent/ecosolvent plotters. Ensures **abrasion and torsion resistance**. Can also be used with laser transfer papers for leather.

INSTRUCTIONS

**1** **AUSPRIELMW** must be used **before applying the transfer prints** on the clean, dry, dust free substrate. **It must be diluted with water** in a 100-400% proportion. **For more absorbent materials** use higher dilution.

**2** **Possibly use a spray gun to apply** otherwise use any brush for glazes, paints and glues. Spray two coats of primer, with a cross movement, and let the support **dry for at least 1 hour** between coats. **NB:** It is not recommended to apply by brush on highly absorbent surfaces.

**3** **Before applying the prints let the substrate dry for 2 hours** at room temperature or at least **½ hour** in **convection oven** at **35-40°C**.

**4** **Continue application as described on the transfer paper's instruction sheet.**

WARNINGS

Maximum adhesiveness is obtained after 48 hours from primer's application. For further information contact your dealer.

Store in a cool dry place.

Do not expose to direct sunlight.

If properly stored the product will maintain its features for 3 months.

STORAGE

The instructions on this sheet are merely indicative and contain details concerning tests carried out in our laboratories with our equipment. Do your own testing. The manufacturer will replace defective material but is not responsible for any damage resulting from incorrect use.

\* **Available packaging:** 0,5 Kg - 1 Kg - 10 Kg
