

FC SOFT

ESCRIPTION

Transfer paper for various light colored surfaces

CHNICAL DAT

FC SOFT is made of a 120 μ m, 115 g/m² natural paper liner, a 30 μ m, 25 g/m² polyolefin layer and a 4 μ m composite polymer finish.

UIPMENT

Color laser printer or copy machine + heat press

ITABLE FOR

Excellent for **natural leather or wood**. Can be used on coated fabrics or synthetic leather.

FC SOFT transfers a very thin film that does not change the skin's natural feel and the look of the leather. Once transferred, the skin is ready for subsequent processing. It needs protective resins or waxes for longer life.

NSTRUCTIONS

Insert the transfer paper in the laser printer's by-pass and set to thick paper or cardboard printing mode (160-200 g/m²). Multicopy print. **Print in mirror mode.**

2

Place the printed side of the transfer paper on the object. Protect the transfer with **a soft silicon pad** (MA STUOI GB80-2) or a double layer (prior to testing) of **polyester fabric** (MA STUOI 04).

With protection MA STUOI GB80-2

Air press: 150 °C for 60"-70" - pressure 5atm **Manual press**: 150 °C for 60"-70" - high pressure <u>With protection MA STUOI 04 (two layers)</u>

Air press: 130 °C for 30"-40" - pressure 5atm

Manual press: 130 °C for 30"-40" - high pressure

3

Remove paper liner when cool.

4

Do not machine wash. Acquires resistance to dry cleaning and excellent resistance to abrasion after appropriate tannery treatment. For further information contact your dealer.

Store in a cool dry place.

Do not expose to direct sunlight.

If properly stored the product will maintain its features for at least 2 years.

The instructions on this sheet are merely indicative and contain details concerning tests carried out in our laboratories with our equipment. Do your own testing. The manufacturer will replace defective material but is not responsible for any damage resulting from incorrect use.
